

Letter of Recommendation

July 10, 2025

Prof. Axel Sichrovsky

I am pleased to write this letter in recommendation of Mr. Tommy Complex, with whom I had the pleasure of working during our theater project Love Camp at Macromedia University in Berlin.

Tommy served as both the lighting designer and technical director for the production, which was staged at Theaterforum Kreuzberg.

His responsibilities included full stage lighting design, operation of the lighting system during rehearsals and performances, and live sound engineering.

Love Camp was an original play developed collaboratively with the students, each of whom contributed a scene inspired by their personal associations with love. Tommy displayed great creative sensitivity in shaping a lighting concept that supported the emotional tone and rhythm of each scene.

Additionally, he adapted the lighting design to fit a parallel production by another class, successfully crafting an atmosphere that suited both performances.

Throughout the project, Tommy demonstrated strong artistic intuition, excellent technical skills, and a dedicated work ethic. He was a collaborative and reliable partner from beginning to end.

I am confident that Tommy will continue to bring exceptional value to any artistic production he joins. I warmly recommend him as a lighting designer and technician for future creative endeavors.

Sincerely,

Prof. Axel Sichrovsky

Macromedia University – Berlin
