

Letter of Recommendation- Tommy Complex

I am pleased to recommend Tommy Complex, with whom I had the opportunity to work closely during the ISAKOS 2025 international medical congress in Munich.

Tommy played a vital technical role as part of the SIMUL Europe team. His responsibilities included setup, operation, and dismantling of complex AV systems- covering projection, large-scale LED screens, sound engineering, and lighting.

He worked seamlessly with a professional crew of nearly 20 people to deliver a high-impact event for thousands of participants.

Tommy demonstrated reliability, technical versatility, and a calm, solution oriented approach under pressure. His contribution was essential to the smooth execution of both the live program and the streamed content. Beyond his technical skills, he showed strong communication and collaboration within a high paced, multilingual team environment.

I confidently recommend Tommy for future roles in live production, stage technology, or technical coordination. He would be a valuable asset to any event team.

Sincerely,

Yaniv Finkenstein
C.E.O.
